**Subject:** Draft 2014 UIC End of Year for review
**Importance:** High

The earlier draft UIC program end of year for fiscal year 2014 has been revised. I have attached our current version, and would like to offer you a chance to comment on this version before it goes final. If you could get back to me with your comments (combined or separately), within a week it would be greatly appreciated.

Feel free to call me if you have any questions.
Nancy

| **Subject:** | RE: |

Sorry, to me it looks like poor quality control on the plots, both for the data plotted and barely legible horizontal scales.

The bottom two graphs have the same vertical and horizontal scales with the same (? Not) "raw" curve shown. Except the raw curves do not match!

The top two have different vertical scales, so aren't as easily compared.

The **raw** curve, showing earthquakes per day, does appear to have a nice drop in count for August, but the same peak then drop (at lower levels) also showed in the April to July 2014 cycle.

| **Subject:** | my PA well with active order lists |
| **Attachments:** | qry_UIC_WELLS9SP_PA.xlsx; qry_AC_Orders_PA2_well.xlsx; qry_AC_Orders_PA_well.xlsx |

Hi Jim,

I will be sending you other files as well, to share or do with as you will. I have gone through most of the Arbuckle wells for counties below code 107, picking up volume information and double checking some well information (PA, surveys and formation at TD).

File descriptions
- qry_AC_Orders_PA_well = active permits with wells having a F1003 date. A few were reentered after the initial PA. (see qry_UIC_WELLS9SP_PA to verify)
- qry_AC_Orders_PA2_well = wells I had previously coded as PA, but do not have a F1072 date for...which doesn't mean there isn't one, only that I do not have it.
- qry_UIC_WELLS9SP_PA = the list of wells I really do consider to be currently plugged.

FYI: I also revamped my long API number. If the well has a sidetrack or a lateral it is a multiple of 10, if it is a recompletion or name change it is a single digit. (01, 02, 03...)

Is any of this helpful?
Nancy
